

Daily Scrums

Sikhanyiso- Sikhanyiso Dladla

Mongezi - Mongezi Dlamini

Kaone- Senoelo Kaone

MJ - Tebogo Mojela

Dons - Donald Mbara

15 August

[15/08, 13:10] Dons: Let's use it locally. we copy and paste the scripts. And copy the exact table structure. Easy. I suggest.

[15/08 13:11] MJ: If it's locally will he have the same information (database data)?

[15/08, 13:15] Dons: Not same information in the database. But same implementation. As long as we copy the exact same thing as from the lamp server.

But if any of us knows how to use the virtual thingy he's talking about we can copy and paste everything to that virtual thingy. Then we can access same thing in the database. As for Firebase.. it's another story. We'll have to learn something it

[15/08, 13:16] MJ: Eish ya I hear you

[15/08, 13:16] Dons: But there's a way to take xampp live. We can use it online together

[15/08, 13:16] Mongezi: so if we have a local one all of us will have to implement it in our devices?

[15/08, 13:30] Mongezi: awe

[15/08, 13:32] Sikhanyiso: Sho

[15/08, 14:47] Dons: The cool part about this is that we can just do stuff using our phone. We can also present our site using that link

[15/08, 14:48] Dons: Via our phone

[15/08, 14:48] Dons: Link-website.epizy.com.. u should click it

[15/08, 15:04] MJ: I'm not sure I understand, will this be local ?

[15/08, 15:04] MJ: Because I see myPhpAdmin there

[15/08, 15:07] Dons: No it's not locally.. that's why we can all access it using this link. MyphpAdmin it's just like mysql in wits lamp. That's where we create tables. The Infinity free site, that's where we store php scripts under htdocs folder.

But if it confuses you, we can look up on something which is cool for everyone??

[15/08, 15:08] MJ: Nah man I'll understand when I take a good look at it later, it's definitely better than Rylans virtually machine

[15/08, 15:08] MJ: Will the app also work ?

[15/08, 15:09] Dons: With the app, for last user story. We can host it locally. Because infinity free is for websites

[15/08, 15:10] MJ: Eish but remember when Rylan said the app and the website have to access the same database ???

[15/08, 15:12] Dons: Ah..?.. I don't remember.. i guess we'll have to use something else. Like Firebase

[15/08, 15:14] MJ: This is stressing me out

[15/08, 15:25] Dons: We can still use phpMyadmin to use it locally using same database. But for the website we host it using infinity free, it's still the same database???. we just important the database and export it if there are some changes in any of them to make them remain the same

[15/08, 15:25] Dons: We just import*

[15/08, 15:26] Dons: I don't know if u follow

[15/08, 15:27] MJ: A little bit ?

[15/08, 15:27] Dons: If u watch the part where he did importing you'll get it

[15/08, 15:27] Dons: He's important a local database so that he can make it go live .. the key part is that, it's the same database it's just that he is just hosting it

[15/08, 15:28] Dons: He's importing**

[15/08, 15:29] MJ: Yea, but I'll also watch the vid

[15/08, 16:00] Sikhanyiso: Ill be able to watch the vids later

16 August

[16/08, 19:28] Dons: Would it be possible for you to do a chat next to list of names. I feel like there's alot of space left by the side. If i centre it there's still alot of spaces left either sides

[16/08, 19:31] MJ: 🙌I like this idea 🙌

[16/08, 19:33] Dons: Me too, like how whatsapp web looks like

[16/08, 19:33] MJ: Ya because I also put the list in the middle and it looked a bit off

[16/08, 19:37] Dons: Ya bro..it looks weird

[16/08, 19:45] MJ: Eish guys our pace 🙌🙌

[16/08, 19:46] Dons: It's so slow neh?

[16/08, 19:48] Dons: I'll try doing something else since I'm done with this. I'll try helping Mongezi/Sikhanyiso with the chat messages..or focus on the diagrams

[16/08, 19:48] MJ: Very slow man

[16/08, 19:48] Dons: I am really concern about the chat part

[16/08, 19:49] MJ: Yah and I'll chow the show events/appointment and then add event/appointment after

[16/08, 19:49] MJ: I feel like it's a complex task 🙌

[16/08,19:50] Dons: Lemme do it using the same approach i did with Emmanuel wirh the app. It's only the html part we should worry about for now

[16/08,19:51] MJ: Alright 🙌🙌

[16/08,, 19:52] Dons: 🙌.. hopefully during the weekend we'll deal with the diagrams and finish them up when we done with the user stories

[16/08, 19:56] Sikhanyiso: Im almost done with what I was doing

[16/08,, 19:57] Dons: That's great???

[16/08,20:01] Sikhanyiso: Is the dropdown for faculties to courses done ill need to connect with the couserid toms

[16/08, 20:01] Dons: Not yet..it is not connected

[16/08,, 20:02] Dons: You mean the backend right?. If so, it's not

[16/08,, 20:05] Sikhanyiso: Yha, ayt

[16/08,, 20:21] Mongezi: So i also have to add the display for the list of users?

[16/08, 20:21] Mongezi: I was going to do work but i had loadshedding the whole day now

[16/08,20:22] Dons: Hardluck??

[16/08,, 20:22] Dons: U can use the one i did

17 August

[17/08, 19:06] Dons: Yes.. I'll send my daily scrum before 23:00

[17/08, 19:23] MJ: Daily scrum I didn't do anything today

[17/08, 19:59] Mongezi: Daily Scrum I also didn't do anything

[17/08, 21:24] Kaone: Daily scrum I did nothing.

[17/08, 22:45] Dons: Daily scrum I did an html part of listing users on a scrollable list.

I will do the fetching part tomorrow

18 August

[18/08, 22:06] Dons: Daily scrum. I can able to fetch all users and display them in a list.

Who's doing the chatting functionality so that we can combine/link ?

[18/08, 22:09] MJ: Daily scrum

Worked on showing events/time slots for appointments... will complete tomorrow

@Dons will also need that list, a copy of it of course that leads to the users' calendar events

[18/08, 22:38] Kaone: Daily scrum didn't do anything practical

19 August

[19/08, 05:14] Mongezi: I'm doing it, sorry i fell asleep yesterday

[19/08, 05:16] Mongezi: Daily Scrum

I didn't add much but today i'm working on writing the function that displays the messages

[19/08, 11:17] MJ: What are those diagrams we didn't have in our last sprint ?

[19/08, 11:18] MJ: No problem

[19/08, 11:23] Kaone: State machine like one

[19/08, 19:28] Dons: Would it be possible for you to do a chat next to list of names. I feel like there's a lot of space left by the side. If i centre it there's still a lot of spaces left either sides

[19/08, 19:30] Dons: Or what y'all think?

[19/08, 19:31] Dons: Oh okay

[19/08, 19:31] MJ: I like this idea

20 August

[20/08, 23:02] Dons: Daily scrum. I linked the post feed that Sikhanyiso did with the respective courses. (but there are some minor bugs with styling)

I also tried modifying the view user list with some styling

[20/08, 23:34] Sikhanyiso: Daily scrum I did nothing today

[20/08, 23:41] Mongezi: Daily Scrum Couldn't get much done because of loadshedding but i'm doing it right now

21 August

[21/08, 09:20] Dons: That the bug i talked about @[FS](#) [MJ](#) [PDI](#)

[21/08, 09:21] Dons: This

[21/08, 09:22] Dons: I'll sort it

[21/08, 09:22] MJ: Ohh okay I was sleepy af I didn't get that [???](#)

[21/08, 13:37] MJ: Anybody figured out how to put stuff to the right of the table ?

[21/08, 13:45] Dons: Oh ya. Noted

[21/08, 13:45] Dons: Like another column?

[21/08, 13:46] MJ: Not quite, but like how you would put messages functionality on the right of the table

[21/08, 13:48] Dons: You should use a div then under css you can float:right; i think

[21/08, 13:48] MJ: I tried, but maybe I'm not using it right, lemme look into it some more

[21/08, 14:44] Dons: Try using % instead of px.. although i am also struggling wiith that [?](#)

[21/08, 14:48] MJ: Oh awe [??](#)

[21/08, 07:06] MJ: 20 August Daily scrum

Replicated getUsers template for events

[21/08, 09:20] Dons: That the bug i talked about @[FS](#) [MJ](#) [PDI](#)

[21/08, 22:24] Dons: Daily Scrum.

I helped with chat Message functionality.

[21/08, 22:25] Sikhanyiso: I havent done anything due to loadshedding

[21/08, 22:26] Mongezi: Daily Scrum

worked on trying to send messages to the database, might complete that tomorrow

[21/08, 22:41] Kaone: Daily scrum

I haven't done anything

Just read about diagrams

[21/08, 22:50] MJ: Daily Scrum

Did some parts on the show events

22 August

[22/08, 23:12] Dons: Daily scrum.

Worked with @FSD on the chat part, user can be able to send Messages to the database.

[22/08, 23:20] MJ: Daily scrum

Didn't do anything today

[22/08, 23:34] Kaone: Daily scrum didn't do anything tangible

Although I looked at design of WhatsApp chatting system I am not sure if we can implement fully

[22/08, 23:43] Mongezi: Daily Scrum

Worked with @FSD on the sending of messages to database

23 August

[24/08, 18:23] Dons: Daily Scrum 23 August

I fixed the dropdown menu bug

[24/08, 18:27] MJ: Daily Scrum 23 August

I didn't do anything

[24/08, 18:36] Sikhanyiso: Daily scrum I haven't done anything

[24/08, 18:49] Mongezi: Daily Scrum I didn't do anything
