

Sprint Retrospective Meeting

Date: 26 August 2020

Time: 20:00

[26/08, 20:05] MJ: @ Mongezi may you send us that list of the things he said we need to do

[26/08, 20:05] Mongezi: this

[26/08, 20:07] Donald: He said the above and also said we should increase code coverage and also be early in meetings like what we did

[26/08, 20:08] Mongezi: Okay i'll start

Sprint Retrospective

Do you guys think us using the lamp server is safe enough?

[26/08, 20:09] MJ: Nope, we were advised to not use it in the first place

[26/08, 20:09] Donald: No , based on what we've encountered lately.

[26/08, 20:09] Donald: And this too

[26/08, 20:11] Mongezi: which alternative method has been the most effective?

[26/08, 20:11] MJ: Do you guys suggest we find an alternative

[26/08, 20:11] MJ: i think the one you showed us, if the one shun gave us is still confusing

[26/08, 20:12] Donald: How about we try accessing the one we were given. I guess there are others that we can ask from

[26/08, 20:12] Donald: Which one is that?

[26/08, 20:13] MJ: Yes i agree

[26/08, 20:13] MJ: That one that also works on the mobile browser

[26/08, 20:13] Mongezi: oh that was @ Donald 's idea

[26/08, 20:16] Donald: Oh ya.. we can do that too

We just need to copy the scripts and put them in files and upload.

What about the app? We done with that right?

[26/08, 20:16] Mongezi: if you do that the mobile app won't work?

[26/08, 20:17] MJ: This

[26/08, 20:17] Mongezi: oh yeah it won't

[26/08, 20:17] Donald: This only works for websites

[26/08, 20:18] MJ: And what will happen when Rylan wants a demonstration that the two platforms are using the same database † σ

[26/08, 20:18] Donald: Ya , that is my biggest concern

[26/08, 20:19] MJ: Damn

[26/08, 20:19] Mongezi: eish † σ † σ so is the option out of the consideration now?

[26/08, 20:20] MJ: i dont know

[26/08, 20:21] MJ: i think we should give shuns way another try first, even though i dont see the light

[26/08, 20:21] MJ: maybe by this friday

[26/08, 20:22] Donald: No problem. Let's do that

[26/08, 20:22] Mongezi: Awe, if it's cool with you guys then i'm cool

[26/08, 20:23] MJ: If you have another suggestion you can shoot, that thing is confusing

[26/08, 20:24] Mongezi: no i don't have another suggestion

[26/08, 20:24] Mongezi: we'll do it together like at the same time so we can help each other

[26/08, 20:24] MJ: Lamp was so perfect

[26/08, 20:29] MJ: I have this fear that we may be out of user stories

[26/08, 20:29] MJ: Enough for next semester

[26/08, 20:30] Mongezi: when do you think are they going to run out?

[26/08, 20:30] Donald: We can include simple things like what we did with liking functionality?

[26/08, 20:31] MJ: Eish ya that's a plan

[26/08, 20:31] Kaone: That's for Rylan to conclude he may perhaps focus on feel of interface

[26/08, 20:31] MJ: And also editing person details

[26/08, 20:31] Kaone: And payment thing

[26/08, 20:34] Mongezi: this won't be a problem for sprint marking?

[26/08, 20:34] MJ: If it's a proper user story with a purpose I don't think so

[26/08, 20:36] Kaone: Wait what are we talking about

[26/08, 20:36] Mongezi: ah cool then we can do it

[26/08, 20:36] MJ: Or is it better to hit up rylan for a meeting so he can tell us what to add

[26/08, 20:36] Donald: We talking about, what if we ran out of user stories

[26/08, 20:37] Mongezi: ahh that guy has forgotten

[26/08, 20:37] MJ: Bro

[26/08, 20:37] Donald: No .. we can add our own simple stuffs

[26/08, 20:38] Donald: He'd say some complex stuffs

[26/08, 20:38] Mongezi: eish yeah he would

[26/08, 20:38] MJ: And also making us add on website and android

[26/08, 20:39] Donald: Yea man

[26/08, 20:39] Kaone: But are we at the stage where we can embed a website page in android

[26/08, 20:39] MJ: What ?

[26/08, 20:40] Kaone: Aren't we*

[26/08, 20:40] Kaone: Like load webpage in android

[26/08, 20:40] MJ: Eish , won't he tell though

[26/08, 20:41] Mongezi: what do you mean?

[26/08, 20:41] MJ: You mean me ?

[26/08, 20:42] Mongezi: yeah

[26/08, 20:42] Kaone: Perhaps depending on the task

[26/08, 20:44] MJ: Like do you think he'll accept that

[26/08, 20:44] MJ: I don't know if I'm making sense

[26/08, 20:45] Mongezi: ohh okay wait what @ Kaone was saying about embedding, who is it beneficial for?

[26/08, 20:45] Kaone: For us

[26/08, 20:46] MJ: Yes

[26/08, 20:46] Kaone: If it's the same task and is independent of others

[26/08, 20:48] Mongezi: oh but won't it be a long process?

[26/08, 20:52] Mongezi: i'm super sleepy, forgive me if i stop replying

[26/08, 20:53] MJ: It's like a away of avoiding building the activities

[26/08, 20:57] Donald: Okay, this enough to be documented right?

[26/08, 20:57] MJ: Ya i think so

[26/08, 20:58] MJ: But we also need sprint planning on another document neh?

[26/08, 20:58] Donald: Yes.

[26/08, 20:59] Mongezi: yeah

[26/08, 21:00] Mongezi: so should decide on the user stories we're using?

[26/08, 21:00] Donald: Yes . For Sprint planning

[26/08, 21:01] Donald: We doing it now? Or tomorrow same time?

[26/08, 21:01] Mongezi: i don't know, maybe yeah tomorrow same time

[26/08, 21:02] MJ: Alright

[26/08, 21:03] Mongezi: cool
